Quick index 23

How to use the guide

New users should read Access, Roles, Overview, and Media Library first. Then use the section for the website content you need to update. The final pages are a checklist, reference, and quick index.

01 · ACCESS

Open the Content Portal

The Content Portal manages the public website. Studio operations stay in the Admin Portal.

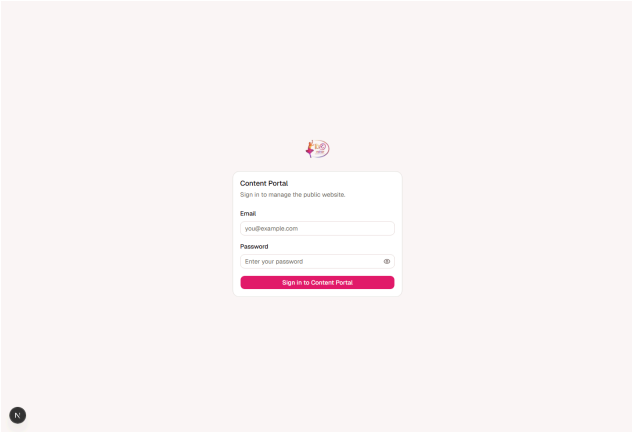

Figure 1. The Content Portal sign-in screen.

1. Open the studio website and go to **/content/login**. Bookmark this address for regular use.
2. Enter the Content Portal email address and password supplied by your Content Owner, then choose **Sign in**.
3. Use **Sign out** from the sidebar when you finish, especially on a shared computer.
4. You can stay signed in to the Admin Portal at the same time. While you are signed in to both, a **Go to Studio Admin** link appears in the sidebar. Signing out of one portal leaves the other signed in.

Portal	Use it for
Content Portal	Public pages, festivals, performances, press, profiles, images, website enquiries, and website settings.
Admin Portal	Students, families, classes, fees, payments, and studio finances.

> **No public sign-up**
> A Content Owner adds portal accounts. Parents and website visitors never need a Content Portal account.

02 · ROLES & SAFETY

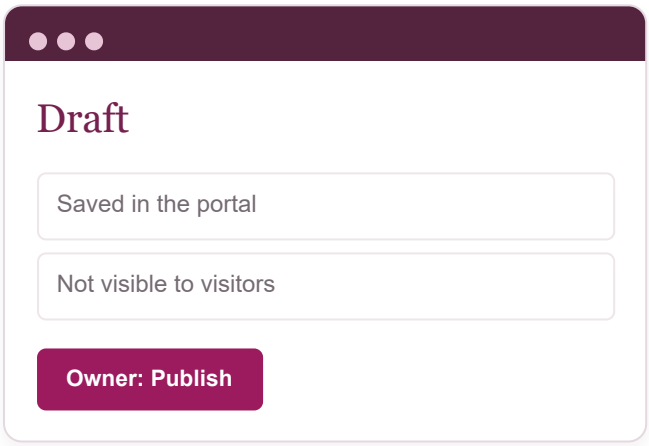

Know what your role can do

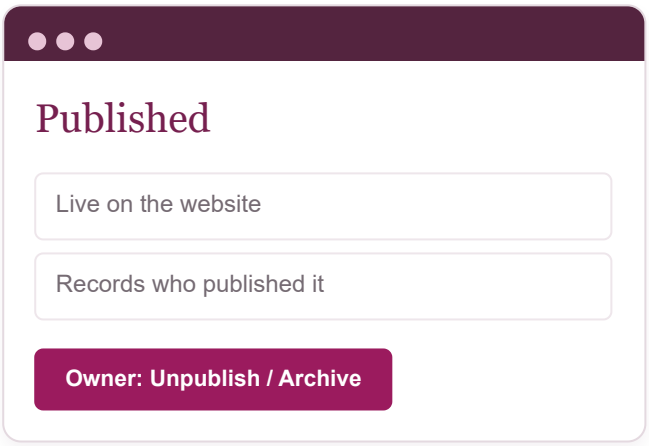

The portal protects live website content with two roles.

Content Owner	Content Editor
Creates and edits all content; publishes, unpublishes, archives, restores; changes website settings; manages users; sees history.	Creates and edits drafts, adds media, and handles website inquiries. Cannot publish, manage users, change website settings, or edit live/archived items.

The publishing rule

Festivals, performances, and press items have three states: **Draft**, **Published**, and **Archived**. Only Published content can appear on the public website or search engines.

Important: editing a live item

When a Content Owner saves a change to a published festival, performance, or press item, it becomes a draft. The page is removed from the website until the owner reviews and publishes it again. Editors can view live items but cannot revise them.

03 · YOUR WORKSPACE

Start from Overview

The Overview shows what is waiting and gives quick routes to each content area.

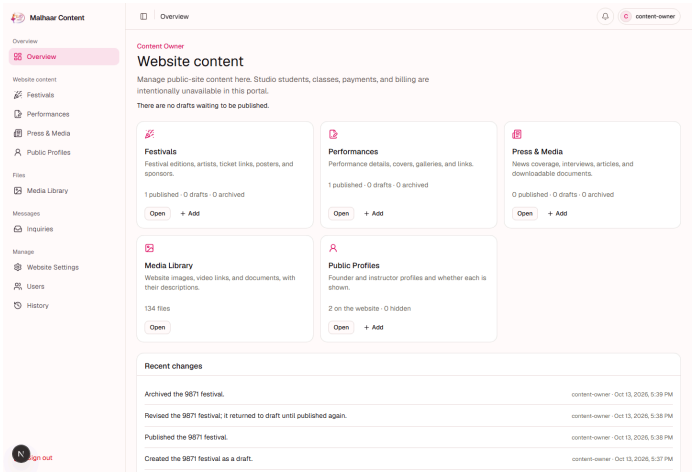

Figure 2. The Content Owner overview with website-content shortcuts and current counts.

- Use the left sidebar to open Festivals, Performances, Press & Media, Public Profiles, Media Library, and Inquiries.
- Owners also see Website Settings, Users, and History in the sidebar.
- The notification bell shows the number of unread website inquiries. Select it to go straight to the inbox.
- The message under the page title tells you whether drafts are waiting for publication.

> **A focused workspace**
>
> Student, billing, and payment information is intentionally unavailable here. Use the Admin Portal for studio operations.

04 · MEDIA LIBRARY

Add files before using them

The Media Library is the shared home for website images, videos, and documents.

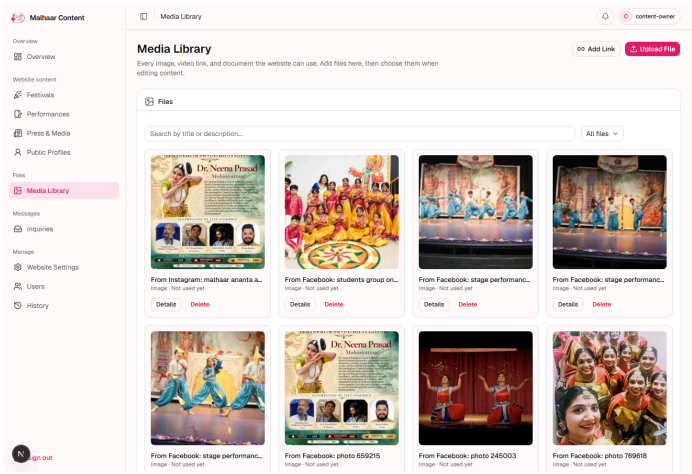

Figure 3. The live Media Library with searchable, reusable website files.

1. Open **Media Library**. Search or filter to check whether a file is already available before adding another copy.
2. Choose **Upload File** for JPEG, PNG, or WebP images (up to 10 MB), MP4, MOV, or WebM videos (up to 100 MB), or PDFs (up to 4 MB).
3. Give every image a short, accurate description for screen readers. Add a clear title for all files.
4. Choose **Add Link** for a video or document hosted elsewhere, such as YouTube or Vimeo.
5. Use **Edit** on a file to improve its title, description, credit, or image focus. Owners can delete a file only when it is not used anywhere.

> **Video processing**
>
> A large uploaded video may need a few minutes to upload and a little longer before it plays on the website. Keep the portal open until the upload finishes.

04 · MEDIA LIBRARY

Upload a file or add a link

Use the file dialog for content stored on your computer, or add a link for content hosted elsewhere.

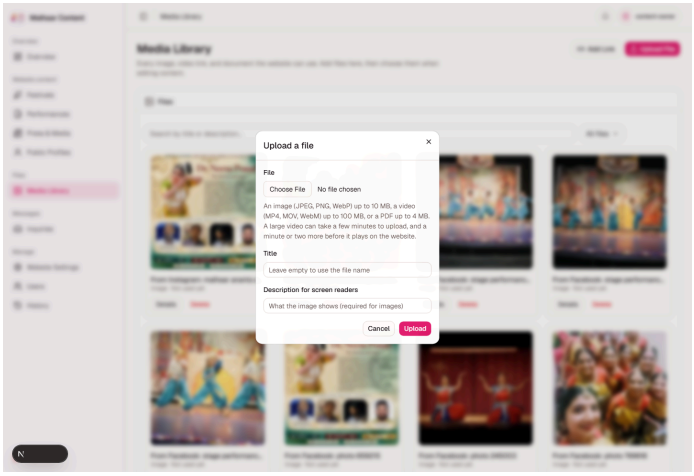

Figure 4. The Upload File dialog in the live Media Library.

1. Select **Upload File**, choose the file from your computer, and wait for its name to appear.
2. Give the file a useful title. For every image, write a concise description of what the image shows; this is required for screen-reader users.
3. Select **Upload** and wait for the confirmation before leaving the page. Large videos can take longer to finish processing.
4. For a YouTube, Vimeo, or other hosted resource, choose **Add Link** instead. Choose Video or Document, give it a title, and paste the full address.

> **Choose the correct source**
>
> Only upload or link content the studio has permission to use. The file stays in the library until an owner deletes it after it is no longer used anywhere.

05 · FESTIVALS

Create a festival edition

Use Festivals for Ananta editions, artists, tickets, venue details, posters, videos, and sponsors.

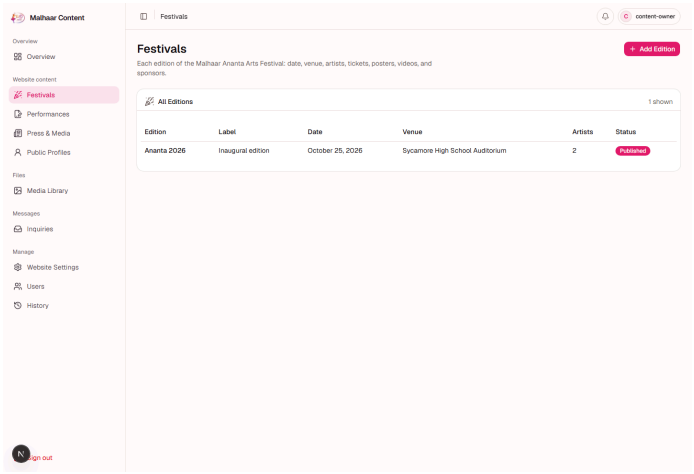

Figure 5. The Festivals list, where an owner can add or open an edition.

1. Open **Festivals**, then select **Add Festival**.
2. Enter the year, edition label, date, Central Time start time, summary, and optional ticket link.
3. Add the venue. The street address and ZIP code are optional but help search engines describe the event.
4. Add each artist in the order they should appear on the festival page. Choose a portrait from the Media Library when available.
5. Choose festival media from the Media Library. Set each item's role so the website knows whether it is a poster, photo, video, or sponsor logo. Add a sponsor name and link when relevant.
6. Save the draft, use **Preview** to review it, then ask a Content Owner to publish when ready.

> **When a new edition is ready**
>
> Publishing makes that edition available on the website and updates its search-engine information. Use Archive for a past edition you want to keep in the portal but remove from the public site.

05 · FESTIVALS

Complete the festival form

The form is organised in the same order visitors use when reading the festival page.

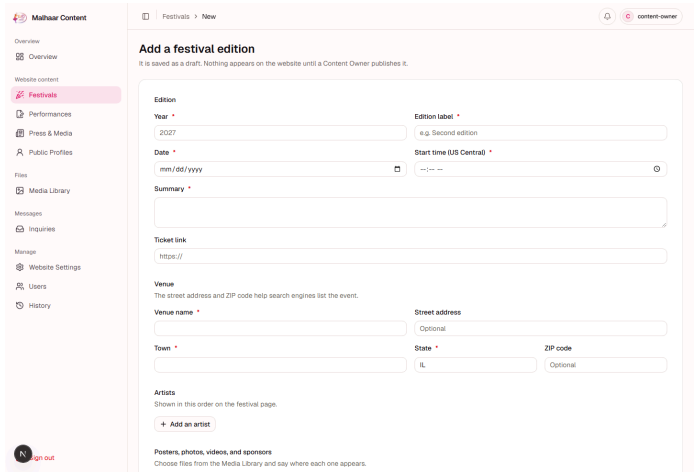

Figure 6. The new Festival form, ready to be saved as a draft.

1. Complete the required Edition fields first. Use a clear edition label and a short public summary.
2. Enter venue details carefully. Town and state are required; street address and ZIP code are optional but improve event search information.
3. Use **Add an artist** for every guest, then use the controls in each card to keep artists in the right display order.
4. In Posters, photos, videos, and sponsors, choose approved library files and give each its correct role. Select **Save draft** when the entry is complete.

Editing a festival

Open an edition from the Festivals list to edit the same form. A published edition is owner-only; once the owner saves a change it returns to Draft and must be published again.

06 · PERFORMANCES

Share performances and galleries

Performances support a dedicated public page, a cover card, links, and an ordered photo gallery.

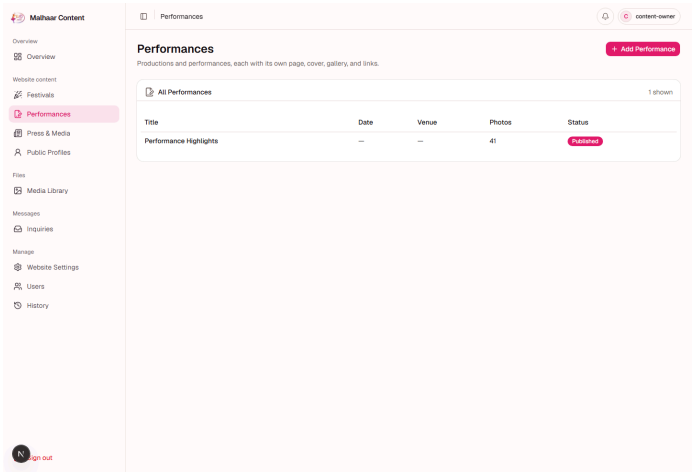

Figure 7. The Performances list, including publication state and public-page links.

1. Open **Performances**, then choose **Add Performance**.
2. Enter a specific title and a one- or two-sentence summary. Add the date and venue where useful.
3. Add the optional full description. Leave a blank line between paragraphs.
4. Select a cover image from the Media Library if the performance should show as a card on the Performances page. Add an optional video or related link.
5. Choose gallery photos and arrange them in the order visitors should see. Save, preview, and have an owner publish it.

> **Cover versus gallery**
>
> A performance with a cover image gets a card on the Performances page. Without a cover, its gallery images can still appear there, but visitors will not see a separate card.

06 · PERFORMANCES

Complete the performance form

Add the public summary first, then use the Media Library to build the card and gallery.

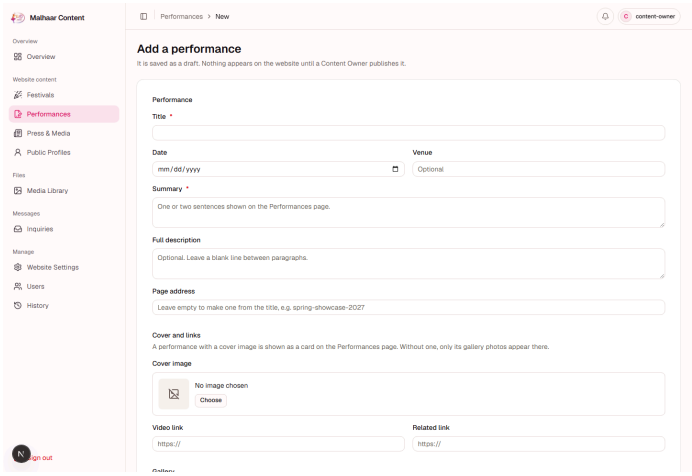

Figure 8. The new Performance form, including cover, links, and gallery.

1. Use the short summary for the text visitors see on the Performances page. Add the optional full description for the performance's own page.
2. Leave Page address empty to have the portal make one from the title, unless you have a short, clear address you specifically want to use.
3. Select a cover image to create a performance card. Add video and related links only after checking they work.
4. Choose gallery images from the Media Library and arrange them before saving the draft. Open the saved draft and use Preview before asking an owner to publish.

> **Editing a performance**
>
> Owners can revise a live performance. Editors can revise drafts only. The same published-to-draft safeguard applies whenever a live item is saved with changes.

07 · PRESS & MEDIA

Add a press item

Use this section for news coverage, interviews, articles, videos, and downloadable documents.

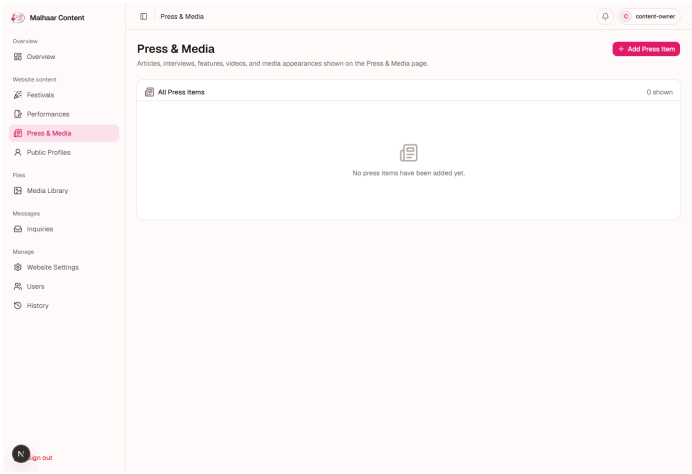

Figure 9. The Press & Media list for published items and drafts.

1. Open **Press & Media**, then choose **Add Press Item**.
2. Enter the headline, optional outlet, type, publication date, and a concise excerpt.
3. Add the public link to the article or video when there is one.
4. Choose an optional feature image and an optional PDF from the Media Library. Save the draft, review it, then have an owner publish it.

> **Use the source visitors should see**
>
> Link to the original publication whenever possible. Attach a PDF only when you have permission to share it.

07 · PRESS & MEDIA

Complete the press form

A press entry can link to an article or video, include a downloadable PDF, and use a feature image.

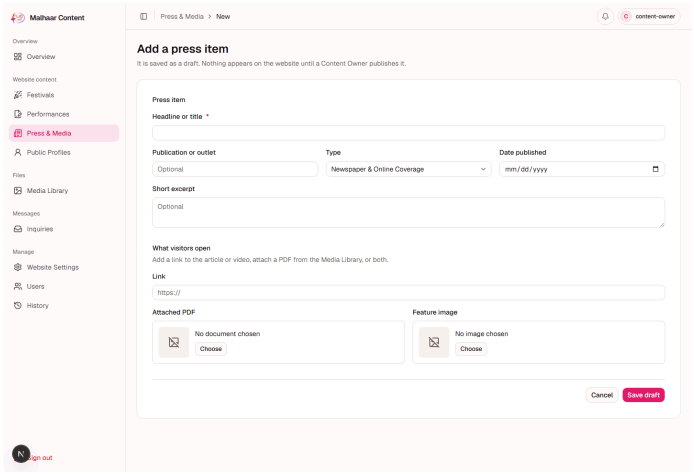

Figure 10. The new Press Item form, with fields for links and Media Library files.

1. Use the headline visitors will recognise, then add the outlet, type, date, and short excerpt where available.
2. Paste the source link in Link. Open it in another browser tab before publishing to make sure it reaches the correct public page.
3. Choose a PDF only from the Document files in the Media Library, and choose an approved feature image if one is available.
4. Save the draft, open it from the Press & Media list to review it, then have an owner publish it.

> **Editing a press item**
>
> A published press item is owner-only. Saving an owner revision moves it to Draft until it is reviewed and published again.

08 · PUBLIC PROFILES

Manage founder and instructor profiles

Profiles use a visibility control rather than draft and publish states.

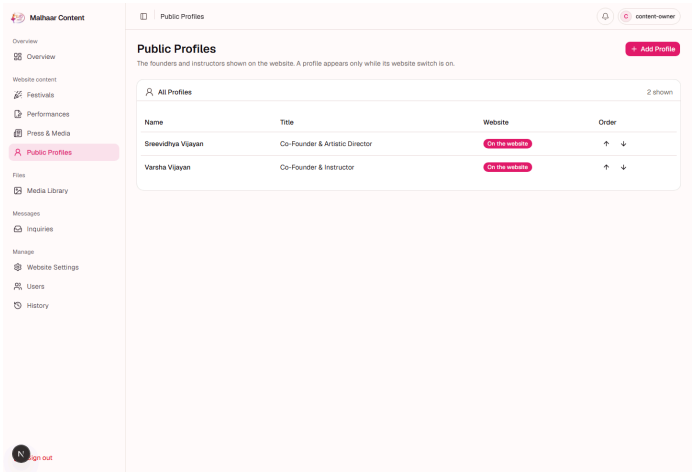

Figure 11. The Public Profiles list, showing which profiles are visible on the website.

1. Open **Public Profiles** and choose **Add Profile**, or open an existing profile to edit it.
2. Enter a short summary for the card and a complete biography. Put each specialization on its own line.
3. Choose a portrait from the Media Library.
4. A Content Owner can turn on **Show this profile on the website**. Keep it off until the wording and image are ready.
5. Editors can prepare hidden profiles, but only an owner can change their visibility or edit a visible profile.

> **Visible profile edits**
>
> Because profile visibility is immediate, review changes carefully before saving a visible profile. The public page updates as soon as the owner saves it.

08 · PUBLIC PROFILES

Complete a public profile

A profile uses one form for identity, biography, portrait, and website visibility.

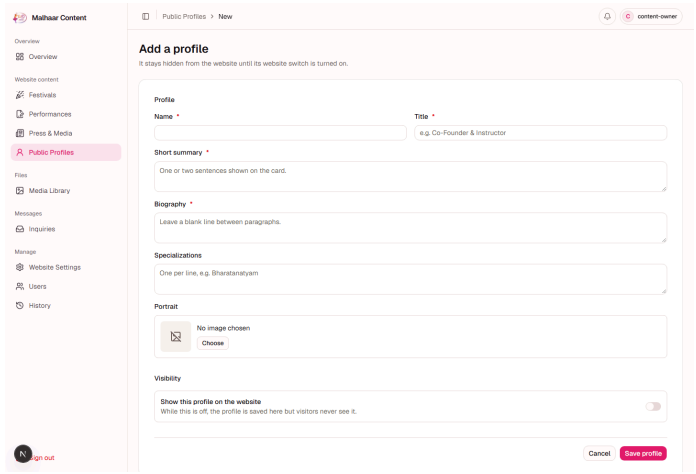

Figure 12. The new Public Profile form, including the owner-only visibility switch.

1. Enter the name, role, short card summary, and full biography. Use a blank line between biography paragraphs where needed.
2. Enter one specialization per line, then choose a portrait from the image files in the Media Library.
3. Save while **Show this profile on the website** is off if the profile is still being prepared.
4. When all wording and imagery is ready, a Content Owner turns the switch on and saves. The profile becomes public immediately.

> **Editing a profile**
> Editors can update hidden profiles. Only an owner can change a visible profile or turn visibility on or off.

09 · WEBSITE INQUIRIES

Respond to contact-form messages

Website contact-form messages arrive in Inquiries for both Owners and Editors.

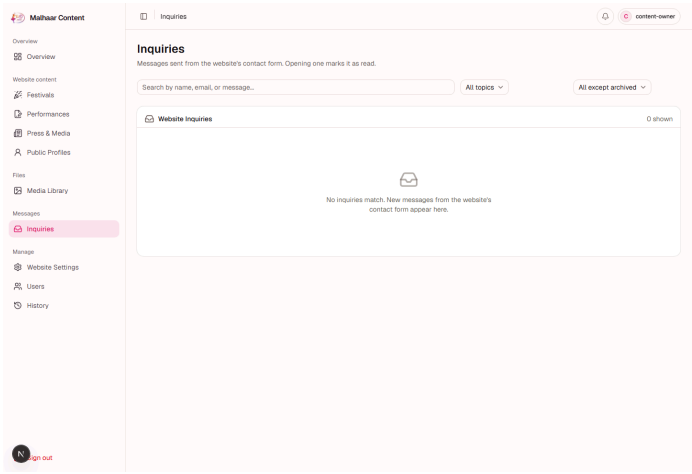

Figure 13. The live Inquiries list, with search and status filters.

1. Open **Inquiries**, or select the bell in the top bar when it shows a new-message count.
2. Use search, topic, and status filters to find the message. Opening a New inquiry marks it Read.
3. Read the visitor's contact details and message. Select **Reply by email** to open a prepared reply in your email app, or contact them by their supplied phone number.
4. After replying, select **Mark as replied**. Archive completed messages to keep the active list focused.
5. If needed, restore an archived message to the list or mark a replied message as not replied.

> **Email-alert note**
>
> The portal shows a note when the email alert for an inquiry could not be sent. The inquiry is still saved here, so reply from the portal rather than assuming it was lost.

10 · OWNER SETTINGS

Keep website details accurate

Only Content Owners can change website settings or manage portal accounts.

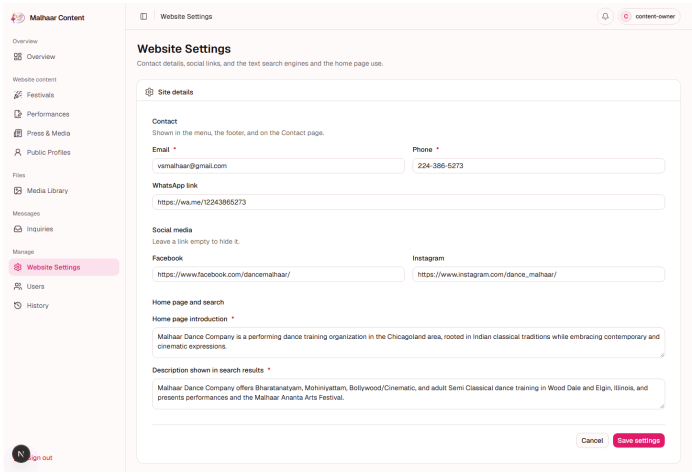

Figure 14. Website Settings manages the public contact details, links, home-page text, and site media.

Website Settings

- Contact email, phone number, and WhatsApp link shown in the menu, footer, and Contact page.
- Facebook and Instagram links; leave a link blank to hide it.
- Home-page introduction and the description search engines show.
- Home video/still, founders photo, and training-program images selected from the Media Library.

Users

- Add a Content Owner or Content Editor with a private starting password.
- Edit a person's name or role.
- Turn off **Can sign in** to block access without deleting history.
- Set a replacement password and share it privately.

1. Open **Website Settings** to update public contact details, social links, homepage wording, or search description. Save only after checking spelling and links.
2. Use the site-media choices below the settings form to select approved Media Library files for the public website.
3. Open **Users** to add or update portal accounts. Give each person only the role they need.
4. Keep at least one active Content Owner. Do not deactivate the last active owner.

> **Live changes**
>
> Saving Website Settings changes public website details straight away. Review entries closely, especially contact information and social links.

10 · OWNER SETTINGS

Add and manage content users

Content Owners control who can enter the portal and what they are allowed to do.

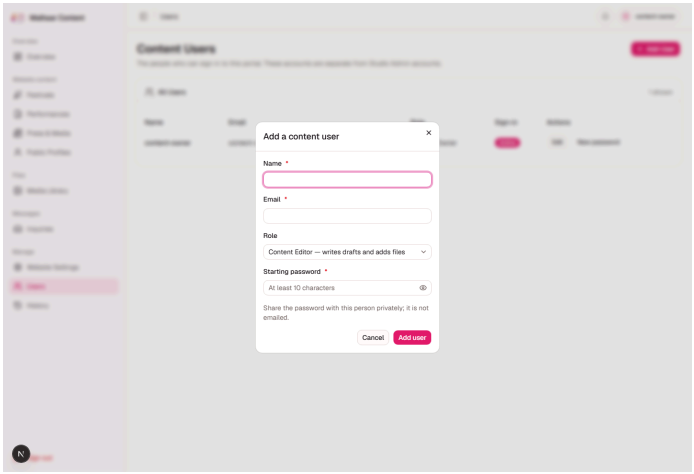

Figure 15. The Add Content User dialog, shown from the Users page.

1. Open **Users** and select **Add User**. Enter the person's name and email, choose their role, and create a starting password of at least 10 characters.
2. Share the starting password privately. The portal does not send passwords by email.
3. Use **Edit** beside an existing person to change their name, role, or sign-in access. Turning off Can sign in blocks future access but keeps the activity record.
4. Use **New password** when somebody needs their password reset. Keep at least one active Content Owner at all times.

> **Use the smallest suitable role**
>
> Choose Content Editor for someone who prepares drafts and handles inquiries. Give Content Owner only to someone responsible for live publishing, website settings, or access management.

11 · HISTORY & ROUTINE

Review changes and publish deliberately

History gives Content Owners an accountable record of portal activity.

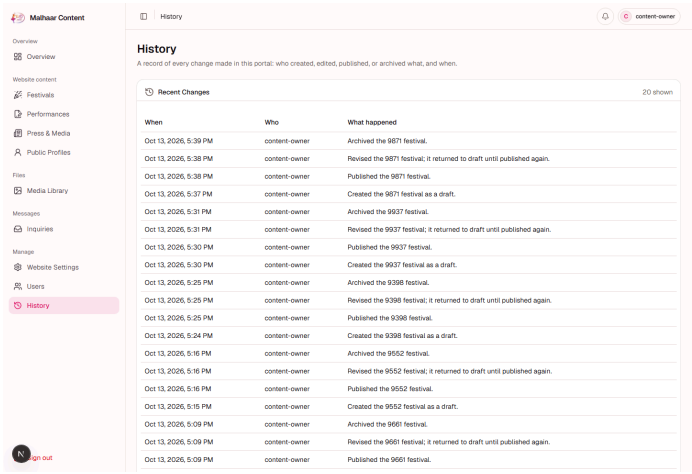

Figure 16. The History page records who changed what and when.

Before publishing

- Check spelling, dates, times, venue, links, and image descriptions.
- Use Preview for festivals and performances.
- Confirm only approved media is attached and appears in the desired order.
- Confirm the public-facing summary works without internal notes.

After publishing

- Open the public page and check it on a phone as well as a computer.
- Confirm links open the intended destination.
- Check that the item appears only where expected.
- Use History to confirm who published it and when.

> **Simple weekly routine**
>
> Review new inquiries, check drafts waiting for approval, confirm upcoming festival/performance details, and keep contact links current. Archive outdated content rather than deleting records you may need to reference.

12 · HELP

Solve common problems

Check these items before asking for support.

Problem	What to do
I cannot sign in	Check that you are using /content/login and the assigned Content Portal credentials. Ask a Content Owner to confirm that your account is active.
I signed out but the other portal is still open	This is expected. Each portal has its own sign-in. Use Sign out in each portal you used, especially on a shared computer.
I cannot see Publish or Archive	These actions are restricted to a Content Owner. Save your work as a draft and ask an owner to review it.
My live edit disappeared from the site	Saving a change returns a published festival, performance, or press item to Draft. Review it and publish it again.
A file will not upload	Check its format and size. Images need descriptions. Keep the page open for large uploads and try again after checking your connection.
I cannot delete a file	It is still used by website content. Replace or remove it from those places first, or leave it in the library.
A website inquiry is missing from my email	Open Inquiries. The portal retains the message even if its email alert did not send.
Website details did not change	Refresh the public page and confirm the settings were saved. Check that you are viewing the live public site, not a preview.
The portal will not load	Check your connection and refresh once. If it continues, share the page name, time, and exact error with your implementation team.

For support, include the portal page, the action you attempted, relevant item title, and a screenshot of any message. Never send passwords in a support request.

APPENDIX A

Content publishing checklist

Use this before making a public website change live.

Prepare

- ☐ I used the correct Content Portal account.
- ☐ The title, summary, dates, venue, and public links are accurate.
- ☐ Images have clear descriptions and appropriate permissions.
- ☐ Media order, captions, and sponsor links are correct.
- ☐ I saved the item as a draft.

Review & publish

- ☐ I used Preview where available.
- ☐ A Content Owner reviewed the public-facing wording.
- ☐ The owner published the approved item.
- ☐ I opened the public page and checked links.
- ☐ I checked History for the recorded change.

Handover details

Item	Studio record
Content Portal address	_____
Content Owner	_____
Implementation support contact	_____
Public website address	_____
Where images and permissions are approved	_____

> **Account safety**
> Use a password manager, keep passwords private, and turn off a departing team member's access promptly. Deactivation preserves the activity history while preventing future sign-in.

APPENDIX B

Glossary and status reference

A shared vocabulary for public website work.

Term	Meaning
Content Owner	A portal user who can publish, archive, manage users, and change website settings.
Content Editor	A portal user who prepares drafts, media, and inquiries but cannot publish or manage settings/users.
Draft	Saved in the portal but invisible to website visitors and search engines.
Published	Live on the public website. Publishing records who did it and when.
Archived	Kept in the portal for reference but removed from the public website.
Media Library	The shared collection of images, videos, links, and PDFs that website content can use.
Alt text	A short description of an image for visitors using screen readers.
Preview	A private view of a festival or performance draft before it is published.
Visibility	The on/off control that decides whether a public profile is shown on the website.
Inquiry	A message sent through the public Contact page.
History	The owner's record of portal changes, including who made each change and when.

Edition notes

This guide describes the Content Portal available on 14 October 2026. It is based on the live portal's available sections and safeguards. It deliberately contains no credentials or private visitor details.

APPENDIX C

Quick index

Select a topic to jump to it.

Access & sign-in	3	Archived content	4
Content Editors	4	Content Owners	4
Festivals	8	History	19
Inquiries	16	Media Library	6
Performances	10	Press & Media	12
Profiles	14	Publishing	4
Settings	17	Support	20
Users	17	Website inquiries	16

Using this document

Contents and index entries link to their sections. Page numbers use the PDF's physical sequence, including its cover. Use your PDF reader's search to find a field or button name quickly.
